Subject: Remedial Investigation Feasibility Study WA MTCA Level 2 Site 4900 Seabeck Hwy Central Kitsap County

Good day, Ms. Sheldrake. Thank you for the progress report and site analysis planning summary. I look forward to reading your response to my FOIA.

I expect you will have the most pertinent background if you have access to the November 2011 EPA Integrated Assessment report, prepared by Ecology and Environment Inc., and the Washington State Department of Ecology/Kitsap County Public Health District Site Hazard Assessment (SHA) that ranked the subject site as a Washington State Model Toxics Control Act (MTCA) Level 2.

Sincerely,

(b) (6)

Hello, (b) (6). Thank you for your email, Calvin Terada has asked me to respond with an update on the concerns you raised. I manage the portion of the Superfund program that triages sites to help determine the most appropriate path forward. It is my understanding that members of my staff spoke with you on February 10th to better understand your concerns and provided email updates on March 11th and March 29th. We are currently developing a sampling plan to fill the data gaps you helped identify, specifically related to concerns about potential off-site movement of contamination. We are planning a sampling event for early June, ideally in conjunction with a high rain event. We are developing a sampling plan to guide that effort and it is my understanding that my staff plan to share that plan with you in the coming weeks.

It is my understanding that we are also working to collect documents responsive to your March 29th Freedom of Information Act request. The current due date for that response is April 26th.

Please feel free to reach out to me, or the staff lead for the site, Brandon Perkins (perkins.brandon@epa.gov or 206-553-6396), if you have additional questions or concerns.

Take care,

Beth

Beth Sheldrake, Emergency Management Branch Chief
EPA Region 10, Superfund & Emergency Management Division

Subject: Remedial Investigation Feasibility Study WA MTCA Level 2 Site 4900 Seabeck Hwy Central Kitsap County

I wish to know what action has or is planned to follow up on this.

I submitted a Freedom of Information Act inquiry in March which has not been answered yet.

(b) (6),

Please accept my apologies for responding so late to your message. I want to thank you for making me aware of the site history and related concerns. I am not exactly sure what EPA Region 10 can do to assist with further assessment and/or cleanup of this property, but I will ask my Site Assessment Program to assess the information provided and determine next steps. I am going to turn your inquiry over to my Emergency Management Branch to determine next steps. Beth Sheldrake, Manager, Emergency Management Branch will assess, assign, and determine next steps and a programmatic point of contact for you.

If there is anything else that I can do, please let me know at your convenience.

Thank you very much for bringing this site to our attention.

Sincerely,

Calvin

Subject: Remedial Investigation Feasibility Study WA MTCA Level 2 Site 4900 Seabeck Hwy Central Kitsap County

Good day, Mr. Terada. I am writing to advise you of recent events regarding the former shooting range located at 4900 Seabeck Hwy. The first two attachments by and on the behalf of the State Recreation and Conservation Office (RCO) address Conversion (demand for repayment) of a RCO Grant issued to make improvements at the subject shooting range.

Washington State Department of Ecology ERTS Report #631120 dated 27 Dec 2011, is germane.

This shooting range has been under two concurrent Superior Court injunctions against discharge of firearms since 2 December 2016. Per the EPA Region 10 report "Integrated Assessment Kitsap Rifle and Revolver Club, November 2011" lead, copper, and other heavy metals continue to litter to property and adjacent wetlands in the Chico Creek watershed. Attachment 3 is the Chapter 9 summary for the EPA Region 10 Integrated Assessment.

I wish to inquire what actions may be initiated toward preliminary remediation planning for this site.
